

ATV FORESTRY TRAILER WITH CRANE VINCH

21-SV07PRO2

[See videos](#)

ATV forestry trailer for easy transport of large and small objects in forests and on farms

- Can be customised for different lengths of timber
- Serrated flip-up and folding bolsters
- Bogie for flexible transport in forest terrain
- Stabilisers for increased stability during loading and unloading
- Brake hand winch included

Här möts kraftig konstruktion och smidighet

Kellfri's forestry trailer for ATVs and/or UTVs is perfect when you need a trailer for forestry work or to transport other long and short objects.

Customise the trailer to suit your purpose with adjustable bolsters, movable sides, winch boom and gate.

TECHNICAL DATA

Width	1250 mm
Central beam	60 x 60 mm
Wheels	22 x 11-10
Drag power	150 kg
Length	3400 mm
Ground clearance	300 mm
Max load	700 kg
Weight	250 kg

The trailer has a high ground clearance, bogie and bogie rack for flexible transport through hilly and difficult forest terrain. With its sturdy and durable components, the trailer will serve you faithfully for many years to come.

Winching, loading and unloading

The winch crane can be quickly adjusted laterally using a spring-back lever in fixed position. This facilitates winching logs and branches from different angles. The length of the winch boom can be adjusted between 160 cm and 220 cm.

The winch wire has a length of 8 metres and a towing capacity of 500 kg. The maximum lifting capacity is 150 kg when the log is right next to the trailer.

When loading or unloading, it is easy to pull out two side stabilisers for increased stability and safety. The serrated bolsters can be quickly angled down with a pin to minimise the lifting height when loading. The serrated design is to prevent the log from rolling when loading on one side.

The forestry trailer can bear a maximum load of 700 kg. The tyres have a dimension of 22x11-10 and are easily inflated via the tyre valves. When attaching/detaching, you can easily adjust the height of the rotatable ball hitch using the parking jack hand crank. 50 mm ball coupling.

Want to use the trailer in more ways? Add an insert floor made of galvanised flat sheet metal.

Extend the load capacity and flexibility of your tipping trailer with swivelling bolsters. Bolster kits, see Accessories.
