

EXTENSION SIDES FOR GRITTER

32-S232FL

Maximise your load and save time by attaching the extension sides to your gritter

- **Approximately 40% more load capacity**
- **Save time and energy, needing fewer refills**
- **Integrated neatly and stably onto the gritter**

The extension sides allow you to fill up to 290 litres into the hopper rather than the standard 210 litres. By heaping the load, you can fit additional litres.

The sides are ideal if you want to save time and energy by filling more sand, gravel or salt every time. It is securely mounted with bolts, nuts and washers. The pre-assembled fasteners keep the sides together.

The gritter is a favourite of people needing to sand and salt their paths, roads, courtyards or other surfaces in both hot and cold weather conditions.

The extension sides fit Gritter ATV 32-S232.

TECHNICAL DATA

Hopper volume	290 l with extension-sides
Colour	Powder coated
L x W x H	1000 x 760 x 165 mm
Width	10 kg
