

## FEEDER WITH ROOF AND COVERED TOMBSTONE RAILINGS FOR HORSES

34-FHBTN

### Information

- 12 feed openings
- Covered tombstone railings
- Adjustable roof height
- 3 base supports provide good stability
- Bale refill opening, 181 cm

This feeder with 12 openings is designed and adapted for horses. In designing this feeder, we have taken the greatest care with regard to safety and functionality.

To prevent horses from injuring themselves on the roof edges, these have been equipped with a protection arch made from tubular pipes. The tombstone railings are covered and the gaps are adapted to minimise the risk of horses becoming stuck. From the ground to the bottom of the tombstone railing is 65 cm and 132 cm to the top of the tombstone railing. The CC dimension between tombstone railings is 59 cm. It is 45 mm between the underside of the grille gate and the base, and 60 mm between the grille gate and the corner posts.

### TECHNICAL DATA

Tombstone railing	43 mm ø
Feed openings	12 pcs
Total width	2000 mm
Total length	2000 mm
Weight	403 kg

### Why is it a good idea to use a feeder?

- You reduce wastage as the animals do not trample around in rejected roughage.
- You improve the hygiene of the feeding area by minimising the risk of contamination.
- It takes less time to tidy the feeding area and you need to throw less roughage onto the manure heap.

**NOTE!** Any plastic film/netting around the hay bale must be removed before use.

Supplied unassembled, takes approximately 2 to 2.5 hours for two people to assemble

### Important factors to consider when choosing a feeder for horses

Even though horses all belong to the same species, there are many different breeds, and therefore different behaviours, from long nerve fibres to short explosive nerve fibres. You know your horses' behaviour and what is best for them, and in order to avoid injuries we ask you to think about how the horses react in various contexts where a feeder is involved.

The number of horses that can gather around a feeder is decisive for the size of the feeder and how many feeders are appropriate. Remember that the less space there is around a feeder, the greater is the risk of injury. You yourself are responsible for your choice of feeder model, since you know your horses best.

Please consider your livestock and their needs when choosing a feeder. Always follow your country's agricultural rules and animal welfare regulations.

### ACCESSORIES

Extend your application with these practical accessories.

**28-333340AM**

Ground-reinforcing plastic mat

**47-1321604**

Netting for bales

**47-1321606**

Hay net hanging
