

HEDGE TRIMMER FOR FRONTLOADERS WITH BOLTED TRIMA ATTACHMENT

27-HTFL2T

Hydraulic hedge and branch trimmer for mounting on frontloaders

- Working width 140 cm
- Fitted with horizontally and vertically adjustable cutterbar
- Bolted separate blades on the cutterbar
- 6/2 electro-valve - switches between cutting angle and drive
- Bolted and replaceable Euro attachment

For trimming hedges, dealing with dense vegetation and road maintenance. This hedge trimmer is suitable for cutting leaves, twigs and smaller branches.

Clears an overgrown road quickly where branches block the road and damage lorries and other vehicles. A cutting width of 140 cm in combination with the lifting height of the frontloader ensures a clean and high corridor for vehicles to pass through.

Superior hedge trimming capacity where tractor access is possible.

Service-friendly cutterbar with bolted separate blades for quick replacement of damaged blades.

The electrical valve used for adjusting cutterbar angle and operating the hydraulic motor requires double-acting hydraulic outlets on the frontloader/wheel loader.

Supplied with two ½" male couplings, control box for the electrical valve and blade protection.

TECHNICAL DATA

Working width	1400 mm
Working angle	Min: -30°, Max: 100°
L x W x H	3079 x 706 x 545 mm
Engine	125CC
Oil flow	15 l/min
Weight	115 kg
