

FEEDER WITH TOMBSTONE RAILINGS, FOR CATTLE, 12 FEED OPENINGS

34-FHBN

Feeder with 12 openings for cattle, with roof and tombstone railing

- 12 feed openings
- Gates with tombstone railings
- Adjustable roof height
- 3 base supports provide good stability
- Adapted for round/large bales

A solid feeder with external dimensions 200 x 200 cm and four opening gates. Feed can be replenished quickly and easily by opening any of the four gates, which open out to the side. The width of the opening is 190 cm and all silage bale sizes fit in the feeder. Three feed openings with robust tombstone railings on each side.

The feed is well protected against the weather under the roof, and is thus always fresh and clean when the animals feed. The roof is height adjustable. Three base supports ensure that the feeder is stable and does not sink into the ground in wet conditions.

Three base supports for stability.
The entire feeder is galvanised for a long service life.
The FHBN is suitable for horned animals.

NOTE! Any plastic film/netting around the hay bale must be removed before use.

Why is it a good idea to use a feeder?

- You reduce wastage as the animals do not trample around in rejected roughage.
- You improve the hygiene of the feeding area by minimising the risk of contamination.
- It takes less time to tidy the feeding area and you need to throw less roughage onto the manure heap.

Please consider your livestock and their needs when choosing a feeder. Always follow your country's agricultural rules and animal welfare regulations.

TECHNICAL DATA

Tombstone railing	43 mm ø
Feed openings	12 pcs
Total width	2000 mm
Total length	2000 mm
Weight	374 kg
