

FEEDER FOR HORSES AND CATTLE, 1.8 M Ø, 4 SECTIONS

34-FR1804

Circular feeder in four sections

- Enough space for a whole bale
- External diameter 180 cm
- Height 50 cm

If you have several horses in the same field and want to take out more feed to them but want to use an affordable feeder, then this is the feeder for you. You will have enough space for a whole bale in the feeder. Decide for yourself how many horses there is space for around the feeder, depending on the size of the horses, the rank and hierarchy in the herd.

The feeder consists of four sections and has sealed joints which are assembled with nuts and bolts along the entire joint.

TECHNICAL DATA

Diameter	1800 mm
Total height	500 mm
Weight	75 kg

Extremely easy to move – you just tip it over and roll it to the new location, or hang it over a pair of pallet forks. You save your back and shoulders.

The circular feeder is most suitable for bales up to 140 cm, for as little feed waste as possible. If you have larger bales, we recommend you to choose a larger feeder, 230 cm in diameter. You can find these feeders Feeder with tombstone rail for cattle, 12 feed openings, Feeder with covered tombstone rail, 12 feed openings. You can find more feeders, kellfri.co.uk.

NOTE! Any plastic film/netting around the hay bale must be removed before use.

Why is it a good idea to use a feeder?

- You reduce wastage as the animals do not trample around in rejected roughage.
- You improve the hygiene of the feeding area by minimising the risk of contamination.
- It takes less time to tidy the feeding area and you need to throw less roughage onto the manure heap.

Please consider your livestock and their needs when choosing a feeder. Always follow your country's agricultural rules and animal welfare regulations.

Important factors to consider when choosing a feeder for horses

Even though horses all belong to the same species, there are many different breeds, and therefore different behaviours, from long nerve fibres to short explosive nerve fibres. You know your horses' behaviour and what is best for them, and in order to avoid injuries we ask you to think about how the horses react in various contexts where a feeder is involved.

The number of horses that can gather around a feeder is decisive for the size of the feeder and how many feeders are appropriate. Remember that the less space there is around a feeder, the greater is the risk of injury. You yourself are responsible for your choice of feeder model, since you know your horses best.

ACCESSORIES

Extend your application with these practical accessories.
