

## FIREWOOD SPLITTER, ELECTRIC-POWERED, 7 TONNES, 70 CM

13-HK777

### A quiet, strong companion on the woodpile

- Safety cage as standard
- 7 tonnes of splitting force
- 2-way and 4-way splitting wedge
- Two-handed control = Safety
- Adjustable splitting length for faster processing
- Large work table for versatile handling of cut firewood

Kellfri's electrical hydraulic firewood splitter is a generously designed construction with 7 tonnes of splitting force. Adjustable splitting length up to 70 cm and variable splitting length adjustment for quicker splitting of shorter logs. The wood splitter is equipped with a protective cage.

The firewood splitter has a two-hand control with 2-way or 4-way splitting wedge which can be set at two fixed heights and a comfortable working height. The splitting speed is 1 dm/sec with double return speed control, the cylinder is controlled by powerful rails for problem-free operation.

Wheels make it easy to move and a substantial removable work table for quick handling of split firewood. Supplied filled with oil in the inbuilt upper tank, phase inverter and emergency stop.

#### TECHNICAL DATA

Operating height	720 mm
Electrical power	3-phase, 400 V
Splitting length	400 - 700 mm
Engine	4 hp
Splitting force	7 tonnes
Weight	175 kg

### ACCESSORIES

Extend your application with these practical accessories.

**13-VS1500DS**  
**13-VT250**

Firewood bulk bag 1,500 l, openable bottom  
Firewood conveyor 5.0 m

**13-VS1500**  
**13-VT275**

Firewood bulk bag 1,500 l  
Firewood conveyor 7.5 m
