

ARENA HARROW, 3-POINT LINKAGE

28-RBH220

[See videos](#)

Robust, sturdy, and flexible riding arena harrow suitable for most surfaces

- 2.2 m working width
- 20 spring tines
- 36 rake tines
- 36 height-adjustable rake tines
- Side scraper for collecting material pushed out from the track

Arena harrow for use with a tractor. Has a working width of 2.2 m. This is the harrow for anybody who needs an even and consistent surface in their paddock or other similar area. You can now easily achieve a uniform surface. This harrow gets the job done.

The adjustable rake tines can be set to go deep, catching any unseen objects in corners and along the edges with the adjustable side scraper.

36 rake sticks that are adjustable in height.

The harrow is equipped with one row of spring tines making it flexible, one row of rake tines, a mesh roller with spiral making it fully flexible, and a side scraper to pull in material pushed out of the groove.

Using a tool, you can easily adjust the height of the rake tines in the back, the mesh roller, and the side scraper. The mesh roller can be removed with the help of a tool. The flexible construction of the three-point linkage ensures better and more consistent results.

The product requires assembly.
