

## MOVEABLE GATE WITH LATCH AND CHAIN

25-300157

### Moveable gate with latch, locking pin and chain

- **Rounded corners at the top reduce the risk of injury if animals attempt to escape**
- **Straight tubular piping so that the gate stands stably on a solid surface**
- **Latch, locking pin and chain link the gates together into a stable system**
- **The gates can easily be connected together with a lock chain**

#### Gate system

A flexible gate system with moveable, stable gates making it easy to erect collection pens, herding paths, stalls, pens, convalescence pens or screened-off areas.

In winter the gates can be used to construct rest sites or as fittings in a loose housing barn. Because the gate has legs, it sinks a little into deep straw bedding, for example, making it even more stable.

The gates can be easily connected together with a latch and locking pin, stand very stably on a solid surface and are further secured with a locking chain.

#### Smart design in every detail

The gates are solidly constructed with tubular piping which provides an extra strong structure and enables the gate to withstand the pressure of even large and heavy animals.

The height is 157 cm and the corners at the top are rounded to prevent injury to the animals if they should attempt to escape. Straight tubular piping at the bottom so that the gate stands stably on a solid surface.

The gates are galvanised for a long service life.

#### High level of safety when you are working with animals

Add a moveable gate with opening – so that you can easily get in and out of the pen.

#### TECHNICAL DATA

Tubular pipe size	41 mm ø
Total width	3,000 mm
Total height	1,570 mm
Weight	36 kg

## ACCESSORIES

Utöka användningsområdet med dessa praktiska tillbehör.

**34-FTH** Feed trough for roughage

**34-FT40** Feed trough for gates, 40 l

**34-FT140**

Feed trough for gates, 140 l
