

MOVEABLE LOOP LEG GATE WITH OPENING

25-300159D

Kellfri gate with opening that is easy to combine with any moveable gate

- It is easy to get in and out of the pen with a wide, tall opening, which increase safety when you are working with animals.
- Easy to move – base supports act as skids
- Flat oval tubular piping for a sturdy and stable gate
- The hinged opening is substantial in size, 120 x 230 cm, which means that you won't get stuck trying to get in or hit your head on the frame
- Locking pin on the opening

Gate system

A flexible gate system with moveable, stable gates making it easy to erect collection pens, herding paths, stalls, pens, convalescence pens or screened-off areas. In winter the gates can be used to construct rest sites or as fittings in a loose housing barn.

Safety

There is always a certain risk of injury when working with livestock – some of the most common causes include butting, kicking and trampling. Using openings to be able to get easily or quickly in or out of a pen means that you don't have to hop over or crawl through the gate.

Smart design in every detail

The gates are solidly constructed with flat oval tubular piping which provides an extra strong structure and enables the gate to withstand the pressure of even large and heavy animals. The height of the gate section is generous at 160 cm so that the animals cannot jump over the erected enclosure, loop tubings to prevent injury to the animals if they should attempt to escape. The design of the loop foot prevents the gate from sinking into the ground, and acts as a skid. The gates are simple to connect together with a chain lock, which facilitates fast and secure connection.

The gates are galvanised for a long service life.

TECHNICAL DATA

L x W x H	3000 x 30 x 2300 mm
Pipe dimension	50 x 30 mm
Tubular pipe size	Flat oval
Total width	3000 mm
Opening width	1200 mm
Total height	1700 mm
Opening height	2300 mm
Weight	63 kg

ACCESSORIES
