

FEEDER WITH COVERED TOMBSTONE RAILS, 12 OPENINGS

34-FRBB

Round feeder with sealed joints and covered tombstone rails

- Round external diameter 230 cm
- Sealed sections
- Covered tombstone rails
- 12 feed openings
- For those who want to put a whole bale in the feeder
- Height 110 cm
- The height of the feed ring is 48.5 cm
- Hot-dip galvanised

For those who want to have a lot of animals in the pen, the feeder has room for twelve animals, but how many eat simultaneously depends on type of animal and hierarchy in the flock.

The feeder consists of four sections and 12 covered tombstone rails attached right down to the bottom. The tombstone rails lock the sections in place as the rail legs are fitted on either side of the joint. All parts are fitted with domed nuts, no sharp edges that the animals can scrape against. When filling, you insert the bale from the top, or lift the feeder up and place it over the bale. When you want to move the feeder, all you have to do is turn it on its side and roll it away, or lift it with a fork lift. The entire feeder is hot-dip galvanised for a long service life.

Why is it a good idea to use a feeder?

- You reduce wastage as the animals do not trample around in rejected roughage.
- You improve the hygiene of the feeding area by minimising the risk of contamination.
- It takes less time to tidy the feeding area and you need to throw less roughage onto the manure heap.

NOTE! Any plastic film/netting around the hay bale must be removed before use.

Important factors to consider when choosing a feeder for horses

Even though horses all belong to the same species, there are many different breeds, and therefore different behaviours, from long nerve fibres to short explosive nerve fibres. You know your horses' behaviour and what is best for them, and in order to avoid injuries we ask you to think about how the horses react in various contexts where a feeder is involved.

The number of horses that can gather around a feeder is decisive for the size of the feeder and how many feeders are appropriate. Remember that the less space there is around a feeder, the greater is the risk of injury. You yourself are responsible for your choice of feeder model, since you know your horses best.

Please consider your livestock and their needs when choosing a feeder. Always follow your country's agricultural rules and animal welfare regulations.
