

WHEELED LAWN EDGER

27-EK51

Efficient lawn edge trimmer that gives grass verges a uniform appearance

- Adjustable cutting depth in 4 settings
- Ergonomically designed work tool
- Euro 5 engine
- Petrol-driven, single-cylinder 4-stroke
- Front and rear adjustable wheels

Get professional results on grass verges – Kellfri's lawn edge trimmer

Grass verges often border on gravel paths, courtyards and other similar surfaces. Grass and weeds grow fast and vigorously during the spring, summer and late summer. This means that verges require continuous maintenance to prevent the grass growing over them. The lawn edge trimmer also makes it easier to see where the guide wire for the robotic lawn mower is, to avoid cutting it.

With its efficient triple-edged cutting blade that cuts through grass, soil and gravel, Kellfri's lawn edge trimmer does the work for you, preventing blistered hands and back ache. Maintaining the verges in your garden and gravel paths creates a uniform, tidy look.

Adjust the edge trimmer to your garden's terrain

Simply drive the wheels along the grass verge, and the blade aligns perfectly to trim the verge back. The wheels are adjustable in height and simple to adjust to all kinds of verges.

The two front tyres can be adjusted laterally, according to the terrain and the need for stability. The rear tyres are height-adjustable, when trimming tall verges for example. The cutting depth is easy to adjust using the handlebar lever with 4 settings.

You can also adjust the height of the wheels on the edge trimmer's chassis. The angle of the cutting blade can be adjusted 25 degrees.

The lawn edge trimmer has a safety lock which must be held down in order to operate the blade. This is to ensure operating safety.

The engine stops automatically when safety lock on the handlebar is released.

Tip! In the horticulture industry, the lawn edge trimmer also works well as a grooving machine for boundary wire for robotic lawn mowers.

As with all Kellfri products, it is important to follow the safety information and instruction manual, and to use common sense.

This will give you many years of pleasure from using your lawn edge trimmer.

TECHNICAL DATA

| | |
|-----------------|----------------------|
| Ignition timing | 25° |
| Blades | 228 mm ø |
| Engine Euro 5 | 1-cylinder. 4-stroke |
| Oil tank | 0,5 liter |
| Oil typ | API SG-SL 10W-30 |
| Cutting depth | 0 - 76 mm |
| Tank (petrol) | 3,3 liter |
| Spark plug gap | 0,7 - 0,8 mm |
| Weight | 32 kg |
