

## FEEDER WITH COVERED TOMBSTONE RAILINGS FOR HORSES, 12 OPENINGS

34-FRB

**Circular feeder with covered tombstone railings, for those with several horses in a field**

- Circular with external diameter 2300 mm
- Covered tombstone railings
- 12 feed openings
- For those who want to put a whole bale in the feeder
- Height 1200 mm

The tombstone railings give 12 feed openings, but how many eat from the feeder simultaneously depends on the rank and hierarchy in the herd. The tombstone railings are covered, which reduces the risk of horses getting their legs caught, sturdy tubular frame with attachment all the way down to the bottom. The feeder is circular and all silage bale sizes fit in the feeding ring. The feeding ring has a strong tubular frame at the top and bottom.

### TECHNICAL DATA

Diameter	2300 mm
Tombstone railing	Ø 43 mm
Feed openings	12 pcs
Total height	1200 mm
Weight	169 kg

When filling, you either open the sections or insert the bale from above. When you want to move the feeder, all you have to do is turn it on its side and roll it away, or lift it with the pallet forks.

The entire feeder is galvanised for a long service life.

**NOTE!** Any plastic film/netting around the hay bale must be removed before use.

### Why is it a good idea to use a feeder?

- You reduce wastage as the animals do not trample around in rejected roughage.
- You improve the hygiene of the feeding area by minimising the risk of contamination.
- It takes less time to tidy the feeding area and you need to throw less roughage onto the manure heap.

### Important factors to consider when choosing a feeder for horses

Even though horses all belong to the same species, there are many different breeds, and therefore different behaviours, from long nerve fibres to short explosive nerve fibres. You know your horses' behaviour and what is best for them, and in order to avoid injuries we ask you to think about how the horses react in various contexts where a feeder is involved.

The number of horses that can gather around a feeder is decisive for the size of the feeder and how many feeders are appropriate. Remember that the less space there is around a feeder, the greater is the risk of injury. You yourself are responsible for your choice of feeder model, since you know your horses best.

Please consider your livestock and their needs when choosing a feeder. Always follow your country's agricultural rules and animal welfare regulations.

## ACCESSORIES

Extend your application with these practical accessories.

**28-333340AM**

Ground-reinforcing plastic mat

**47-1321604**

Netting for bales

**47-1321606**

Hay net hanging
