

GRITTER 1.0 M, ATV

32-S230

[See videos](#)

For small and large scale ice clearing

For small and large scale ice clearing

A gritter with simple and stable design for sand and salt and with quick adjustment of spreading quantity.

The hopper holds 230 litres, substantial wheels drive the spreading auger which is easily disengaged for transport and re-engaged with a simple manual operation

With 50 mm ball coupling for towing using an ATV or tractor.

A well-constructed tool offering top functionality and long service life, a good addition to your ATV machine fleet.
