

LOOP LEG GATE WITH CALF GATE

25-300160KS

Kellfri gate with calf gate

- For when you want to separate your calves on pasture or in loose housing
- The height is 102 cm and the width is adjustable

With a calf gate in the gate, you can construct a calf creep feeder or calf pen on pasture or in loose housing. The calves can go into their own pen for feeding or for separation from the adult livestock. The width of the calf gate can be adjusted to the calves' size and the height is 102 cm.

Gate system

A flexible gate system with moveable, stable gates making it easy to erect collection pens, herding paths, stalls, pens, convalescence pens or screened-off areas.

In winter the gates can be used to construct rest sites or as fittings in a loose housing barn.

TECHNICAL DATA

H x W	Calfgate 1,020 x 520 mm
Pipe dimension	50/30 mm
Total width	3000 mm
Total height	1700 mm
Weight	40 kg

Kellfri's system of movable gates can be complemented with a gate section with calf gate

Smart design in every detail

The gates are solidly constructed with flat oval tubular piping which provides an extra strong structure and enables the gate to withstand the pressure of even large and heavy animals.

The height of the gate section is generous at 160 cm so that the animals cannot jump over the erected enclosure, loop tubings to prevent injury to the animals if they should attempt to escape.

The design of the loop foot prevents the gate from sinking into the ground, and acts as a skid. The gates are simple to connect together with a chain lock, which facilitates fast and secure connection. The gates are galvanised for a long service life.

ACCESSORIES

Extend your application with these practical accessories.

34-FT40

Feed trough for gates, 40 l

34-FTH

Feed trough for roughage

34-FT140

Feed trough for gates, 140 l
