

PALLET FORK, 2.5 TONNES, EURO

16-JPF2E25

Mechanically adjustable pallet fork in new updated version with FEM suspension and new design on the pallet fork frame for better working visibility

- Fork length 1,200 mm
- Frame width 1,200 mm
- Mechanically adjustable forks
- Euro attachment
- Max. weight 2.5 tonnes
- FEM II A suspension

The market's most affordable mechanical pallet fork in a new, updated version.

CE marked and manufactured to the highest quality and industry standard. Supplied with FEM II A suspension and laser cut attachments.

The new design of the pallet fork rack gives you good visibility and full control both when loading and unloading. The fork arms are manually adjustable with manual locking.

Strong and flexible lifting device for heavy loads

A powerful high-quality pallet fork that is suitable for many different lifts. The long length of the fork allows you to lift an EU pallet along its entire length. It has a high lifting capacity with a maximum weight of 2.5 tonnes and laser cut attachments. Ideal for front loaders and wheel loaders. Supplied with Euro attachment.

The new design of the pallet fork rack has been developed to provide full control and good visibility both during loading and unloading, thanks to the low frame construction.

CE marked and manufactured to the highest quality and supplied complete with fork arms and FEM II A suspension.

Adjustable pallet forks

The width between the forks can easily be adjusted manually to suit your needs. To adjust the width, move the forks to the current position. The fork rack has pre-selected positions at intervals of 10 cm. You can easily lock the fork position by using the locking latch on the top.

Avoid uneven horizontal load distribution for best stability.

The environmental images show a 1.5 tonne pallet fork with attachment that fits Trima.

TECHNICAL DATA

Type	FEM II A
Maxload	2500 kg
Pallet fork frame width	1200 mm
Pallet fork frame height	407 mm
Pallet fork width	100 mm
Pallet fork length	1200 mm
Pallet fork thickness	40 mm
Weight	154 kg
