

COMPLETE WINCH WITH 1,400 KG PULLING FORCE

21-KW1400

Complete hydraulic gear-driven winch for forestry cranes or for use as a log skidder winch

- **1,400 kg pulling force**
- **35-metre long 6 mm wire with fitted winch hook**
- **Robust protective cover fitted over the hydraulic couplings**

Great accessory for cranes when working with timber that is hard to reach.

The diameter of the winch's attachment axle is 50 mm.

The diverter pulley attachment is 60 x 60 mm.

The valve block is not prepared for constant pressure systems such as the John Deere type.

Delivered with weld-on brackets for winch and diverter pulley, hydraulic hoses and hand-operated hydraulic valve block, remote control unit available as optional extra.

A certain amount of customisation may be required.
